EXPERIENCE

Dire Wolf Digital, Denver, CO — *Web and Tools Engineer*

November 2017 - PRESENT

- Updated company website for mobile responsiveness using jQuery, PHP, and Bootstrap
- Collaborated on the online merchandise store using Vue.js, Braintree API, and SQL databases
- Created test suite application for QA department to track testing progress using Knockout.js, Gulp.js, Jenkins, and MongoDB
- Created a tool to manage tournaments and events for the game clients by integrating with a Scala backend and SQL databases
- Created tool for producers and designers to create dynamic content for the games without the need for offline maintenance or rebuilding of files.
- Created a Vue.js dynamic input system to render complex HTML input fields with various validation such as RegEx, type ahead fields, or nested JSON objects and arrays.
- Created automated email reporting for stakeholders

Dire Wolf Digital, Denver, CO — *QA Lead and Software Tester*

July 2013 - November 2017

- Led a team of 6-8 software testers
- Created micro applications in Excel using VBA to enhance QA testing and reporting
- Created and reviewed test plans for the QA Testers
- Provided reports and feedback to producers and stakeholders on the quality of the product and the confidence level of builds
- Provided workflows and direction for remote QA teams
- Tested functionality and visuals of weekly and quarterly content

Apple Retail, Pasadena, CA — *Retail Specialist*

October 2010 - June 2013

- Answered questions and sold products to customers
- Taught classes about Apple's hardware and software
- Troubleshoot issues and fixed problems on customer's devices
