I'm a full stack engineer with excellent analytical skills and attention to detail while keeping focus on the larger picture. I am seeking a position at a diverse software company creating web content and intranet applications.

EXPERIENCE

Nacelle Inc, Denver, CO—*Software Engineer*

August 2021 - June 2022

- Created a front end dashboard application using Vue.js for clients to integrate with their Shopify and Contentful APIs
- Used Vue.js, Vuex, and Vue Router for reactive websites, data storage, and browser navigation
- Worked directly with visual designers to implement their mocks into functional web applications
- Integrated GraphQL APIs for data manipulation and retrieval
- Worked directly with backend engineers to create a seamless and fast user experience
- Created robust feature flag system using LaunchDarkly to allow for fast deployment and controlling when a feature is released

Promontory MortgagePath, Denver, CO—*Front End Engineer*

April 2020 - August 2021

- Developed front end applications using Angular and Angular Material for both bank employees and mortgage applicants
- Integrated with REST APIs and GraphQL database integrations
- Planned releases using Agile Scrum methodologies
- Transitioned infrastructure from AngularJS to Angular
- Trained new team members on our infrastructure and frameworks
- Peer reviewed code and provided feedback

Dire Wolf Digital, Denver, CO— *Web and Tools Engineer*

November 2017 - April 2020

- Updated company website for mobile responsiveness using jQuery, PHP, and Bootstrap
- Collaborated on the online merchandise store using Vue.js, Braintree API, and SQL databases
- Created test suite application for QA department to track testing progress using Vue.js, Gulp.js, Jenkins, and MongoDB
- Established a process and tool for producers and designers to create dynamic content for the games without the need for offline maintenance or rebuilding of files
- Developed a Vue.js dynamic input system to render complex HTML input fields
- Designed and implemented automated email reporting for stakeholders
