EXPERIENCE

Scribd Inc, Denver, CO—*Software Engineer*

August 2022 - Present

- Created web interfaces for users to create, update, and view content using React frontend and Ruby backend via GraphQL
- Set up AB tests and logging behaviors to track user engagement
- Added ads to the page to allow additional company revenue and user engagement
- Worked with Designers, Engineers, and Project Managers to schedule work over 2 week sprints

Nacelle Inc, Denver, CO—*Software Engineer*

August 2021 - June 2022

- Created a front end dashboard application using Vue.js, Vuex, and Vue Router for clients to integrate with their Shopify and Contentful APIs
- Integrated GraphQL APIs for data manipulation and retrieval
- Worked directly with visual designers to implement their mocks into functional web applications
- Worked daily with back end engineers for a seamless UX
- Created robust feature flag system using LaunchDarkly to allow for fast deployment and to control when a feature is released

Promontory MortgagePath, Denver, CO—*Front End Engineer*

April 2020 - August 2021

- Developed front end applications using Angular and Angular Material for both bank employees and mortgage applicants
- Integrated with REST APIs and GraphQL database integrations
- Planned releases using Agile Scrum methodologies
- Transitioned infrastructure from AngularJS to Angular
- Trained new team members on infrastructure and frameworks

Dire Wolf Digital, Denver, CO— *Web and Tools Engineer*

November 2017 - April 2020

- Updated company website and online merchandise store for mobile responsiveness using Vue.js, jQuery, PHP, Bootstrap, REST APIs, and SQL databases
- Created testing application for QA testers to track progress using Vue.js, Gulp.js, Jenkins, and MongoDB
- Established a process for other departments to create dynamic content without offline maintenance or rebuilding of files
