I'm a full stack web developer with excellent analytical skills and attention to detail without compromising the larger picture. I am seeking a position at a diverse software company creating web content and intranet applications.

EXPERIENCE

Dire Wolf Digital, Denver, CO— *Web and Tools Engineer*

November 2017 - PRESENT

- Updated company website for mobile responsiveness using jQuery, PHP, and Bootstrap
- Collaborated on creating online store and an internal tool for creation of new products using VueJS, Braintree, and SQL database
- Created internal test suite application for QA department to track testing progress using Knockout and Gulp
- Created internal tool for producers and designers to create dynamic content for the games without the need for offline maintenance or rebuilding of files.

Dire Wolf Digital, Denver, CO — *QA Lead and Software Tester*

July 2013 - November 2017

- Lead a team of 6-8 software testers and train new employees
- Created micro applications in Excel using VBA to enhance QA testing and reporting
- Created and reviewed test plans for testers to follow
- Provided reports and feedback to producers and stakeholders on the quality of the product and the confidence level of builds
- Created new processes and protocols for the QA department
- Provided workflows and direction for remote QA teams
- Blackbox and whitebox testing
- Functional and visual testing
- Weekly and quarterly content testing

Apple Retail, Pasadena, CA — *Retail Specialist*

October 2010 - June 2013

- Answer questions and sell products to customers
- Teach classes on Apple's hardware and software
- Troubleshoot basic issues and fix problems on customer's devices
