I'm a full stack engineer with excellent analytical skills and attention to detail while keeping focus on the larger picture. I am seeking a position at a diverse software company creating web content and intranet applications.

EXPERIENCE

Promontory MortgagePath, Denver, CO—*Front End Engineer*

April 2020 - Present

- Develop front end applications using Angular and Angular Material for both bank employees and mortgage applicants
- Integrate with REST APIs and GraphQL database integrations
- Strategize and plan releases using Agile Scrum methodologies
- Transition infrastructure from AngularJS to Angular
- Train new team members on our infrastructure and frameworks
- Peer reviewed code and provided feedback

Dire Wolf Digital, Denver, CO— *Web and Tools Engineer*

November 2017 - April 2020

- Updated company website for mobile responsiveness using jQuery, PHP, and Bootstrap
- Collaborated on the online merchandise store using Vue.js, Braintree API, and SQL databases
- Created test suite application for QA department to track testing progress using Vue.js, Gulp.js, Jenkins, and MongoDB
- Established a process and tool for producers and designers to create dynamic content for the games without the need for offline maintenance or rebuilding of files
- Developed a Vue.js dynamic input system to render complex HTML input fields
- Designed and implemented automated email reporting for stakeholders

Dire Wolf Digital, Denver, CO — *QA Software Lead*

July 2013 - November 2017

- Created and reviewed test plans for a team of 6–8 software testers
- Developed micro applications in Excel using VBA to enhance QA testing and reporting
- Provided reports and feedback to producers and stakeholders on the quality of the product and the confidence level of builds
- Organized workflows and direction for remote QA teams
